

Folded Filter Paper

Working Diagram

NO	Assignment Order
1	Find the filter paper of the corresponding material, specification and color according to customer requirements, and then find the corresponding mold
2	Find the corresponding roller in the mold storage area
3	Adjust the machine table, set the folding number and various temperatures
4	Cut the printed paper according to the mark, and put hot melt glue on the joint of the paper block
5	Glue the paper block joints together
6	Put it into the outer net, put it into the inner net, and check whether the height of the paper is consistent with the height of the iron net
